Climate change will become a “main pillar” of the relationship between the European Union and China, said leaders on Monday.

ACUERDO DE PARÍS

Art. 2: Objetivos

Fortalecer la respuesta mundial a la amenaza en el contexto del desarrollo sostenible y los esfuerzos para reducir la pobreza, en particular:

- Mantener la elevación de la **Tª media mundial** de los niveles pre-industriales; **intentando limitarlo a 1,5 °C** por encima de los niveles pre-industriales, lo que reduciría significativamente los riesgos e impactos asociados con el cambio climático.
- Incrementar y fomentar la capacidad de adaptación al cambio climático, así como el desarrollo bajo en emisiones de gases de efecto invernadero, **de manera que no amenace la producción de alimentos;**
- Hacer que los flujos financieros sean consistentes con un desarrollo dirigido hacia un sistema de bajas emisiones de gases de efecto invernadero y resiliente al clima.

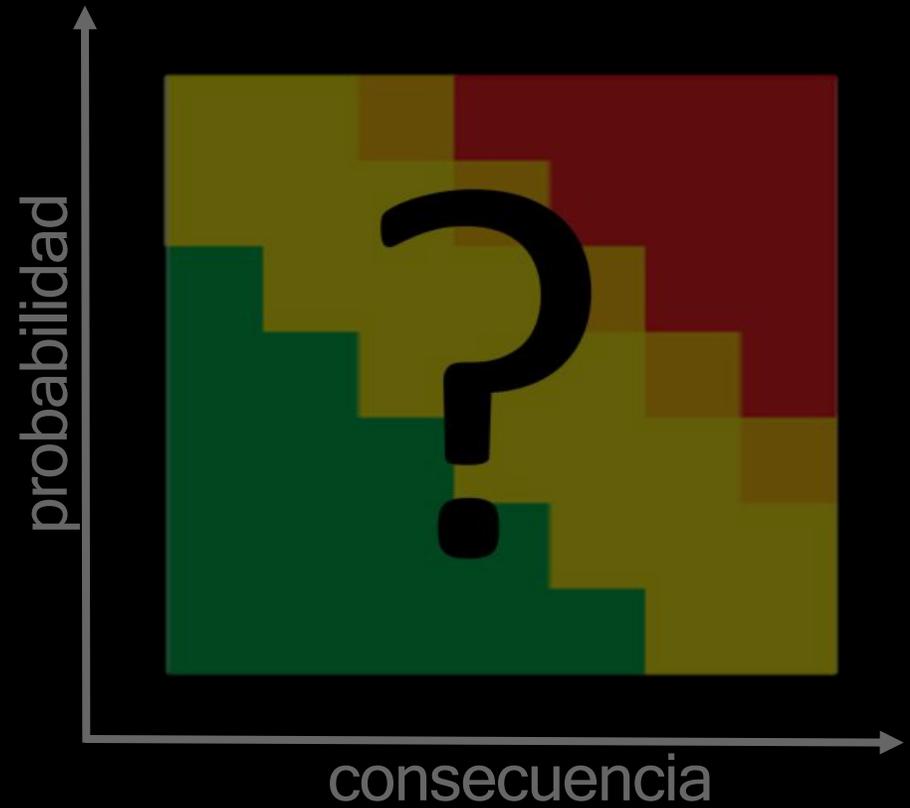

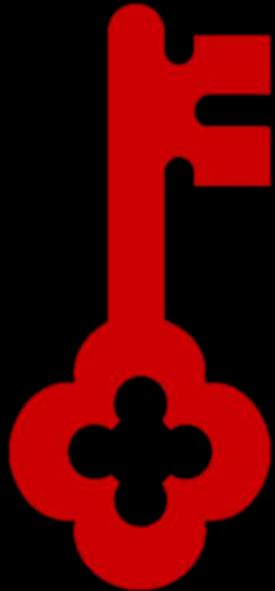

Balance emisiones cero al 2050

El 2020 cada país debe entregar su Estrategia al 2050 y nuevas metas

Cada 5 años, los países se comprometen a entregar sus nuevas metas (NDCs), las que deben ser cada vez más ambiciosas.

El Acuerdo se llevará a cabo equitativamente, y bajo el principio de responsabilidades comunes pero diferenciadas, considerando las capacidades y circunstancias nacionales.

Big investors urge G7 to step up climate action, shift from coal

Alister Doyle

3 MIN READ

OSLO (Reuters) - Institutional investors with \$26 trillion in assets under management called on Group of Seven leaders on Monday to phase out the use of coal in power generation to help limit climate change, despite strong opposition from Washington.

In the letter, pension funds and asset managers said that “effective climate mechanisms” were vital for investors to make informed investment decisions.

“The investors are concerned they could lose money if different governments have inconsistent policies on climate change”

Exxon, BP and Shell back carbon tax proposal to curb emissions

HSBC includes climate among its ‘top and emerging risks’

08 April 2019

London-based bank HSBC has included climate-related risk in its list of ‘top and emerging risks’ for the first time.

The physical and transition risks posed by climate change “create potential financial impacts for HSBC through higher risk-weighted assets (RWAs), greater transactional losses and increased capital requirements”, HSBC said.

Last year, the bank was among a group of the world’s largest lenders that [were criticised for their perceived lack of action](#)

California First State in the Nation to Divest from Coal

SB 185 Signed by Governor Brown

Thursday, October 08, 2015

SACRAMENTO - Governor Jerry Brown today signed into law SB 185, which requires California's public pension funds, CalPERS and CalSTRS, to divest from holdings in thermal coal. The measure is the first of its kind in the nation. CalPERS and CalSTRS are the largest public pension funds in the nation, with \$293 billion and \$184 billion in assets, respectively.
